WE MANUFACTURE WELDING CONSUMABLES & EQUIPMENT

Magmaweld is a manufacturer of Stick Electrodes, MIG/MAG & TIG Wires, Flux Cored Wires, Submerged-Arc Wires and Fluxes, Welding Machines, Welding Ancillary Products and Automation Systems in Turkey. Oerlikon Kaynak Elektrodları ve Sanayi A.Ş. was founded in 1957 in order to manufacture stick electrodes as a licensee of Oerlikon-Buehrle AG.

Welding Consumables Factory
Organise Sanayi Bölgesi 2. Kısımlı, Manisa / Turkey

Welding Machines and Automation Factory
Organise Sanayi Bölgesi 5. Kısımlı, Manisa / Turkey

In the year 2000, in order to reduce costs, to strengthen the leading position in Turkey and turn Magmaweld into a global brand, two old factories in Istanbul were moved to new, state of the art factory in Manisa, situated in the west of Turkey. In 2010 the second factory has been opened also in Manisa to produce high-tech welding equipment as well as to integrate robotic automation systems.

The MAGMAWELD brand came out as an analogy between the molten core of the earth, the MAGMA and the WELDPOOL.

Magmaweld greatly values technical education and has been contributing to the training and education of thousands of welders through regular, free of charge courses since 1961. This service helps to increase consumer awareness and technical competence throughout the industry.

Magmaweld strives for customer satisfaction and process excellence. In order to satisfy customer needs, all questions and remarks about products, training, welding technologies, welding procedures, standards, work safety and automation are processed through the call center at +90 444 WELD (4449353) or through live support from www.magmaweld.com where the relevant information can be obtained from Magmaweld's experts.

INDEX

SINGLE PHASE WELDING MACHINES

Portable DC MMA Welding Inverters
Monostick 150i, Monostick 165i, Monostick 180i, Monostick 200i, Monostick 201i

5

Portable Semi Professional TIG and MMA Welding Inverter
Monotig 160i Basic, Monotig 160ip, Monotig 200i

7

Single Phase Compact DC MIG / MAG Welding Machines
Monomig 200ik, Monomag 180

9

HEAVY DUTY MMA ENGINE DRIVEN WELDERS

MPM 15/400 I-KA, MPM 20/500 P, MPM 500 P

11

MMA WELDING MACHINES

Industrial DC MMA Welding Inverters
ID 250 E, ID 300 E, ID 350 E, ID 400 E

13

Heavy Duty Thyristor Controlled DC MMA Welding Machines
RD 500 E

15

Heavy Duty Mechanically Controlled DC MMA Welding Machines
TD 355, GL 451, GL 600

15

INDUSTRIAL TIG WELDING MACHINES

Industrial DC TIG Welding Inverters
ID 250 TDC, ID 250 T DC Pulse, ID 300 T DC, ID 300 T DC Pulse, ID 300 TW DC Pulse

17

Tig Torches & Consumables

19

INDUSTRIAL MIG/MAG WELDING MACHINES

Industrial MIG/MAG Welding Inverters
ID 300 M, ID 400 MW, ID 500 MW

21

Industrial Compact DC MIG / MAG Welding Machines
RS 200 MK, RS 250 MK, RS 300 MK, RS 350 MK, RS 400 MK

23

Industrial DC MIG / MAG Welding Machines
RS 250 M, RS 300 M, RS 350 M, RS 400 M, RS 450 M, RS 500 M

25

Industrial Water Cooled DC MIG / MAG Welding Machines
RD 650 MW, RS 350 MW, RS 400 MW, RS 450 MW, RS 500 MW

27

Portable DC MMA Welding Inverters

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

- » Operates with 1 Phase 230V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » Excellent welding characteristics wth Rutile and Basic electrodes.
- » Minimum welding current starts from 10A, good results on thin metals with scratch TIG welding.
- » Current adjustment scale is arranged by electrode diameters.
- » Especially designed for outdoor use, protection class is IP 23S.
- » Light weight, easy to carry but rugged design to last long in tough working conditions, and large foot print to avoid easy tilting over.
- » No performance loss with long mains and welding cables.
- » Fan cooled and protected against overheating.
- » Electrode-holder, earth clamp and mains cables are included in the standard equipment.
- » According to EN 60974 these equipment are classified as Class A equipment. They are intended to use in locations other than residential locations where the electrical power is provided by the public low-voltage supply system.

Electrode Holder with Cable

Earth Clamp and Cable

Portable Semi Professional TIG and MMA Welding Inverter

For Steel & Stainless Steel

Inverter Technology for Workshops.

Monotig 160i Basic

- » Operates with 1 Phase 230V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » Good thin metal welding, due to its stable low current starting from 10 Amp.
- » TIG arc ignition by Soft-Start. No HF.
- » Professional torch and foot pedal for triggering.
- » Especially designed for outdoor use, protection class is IP 23S.
- » Light weight, easy to carry but rugged design to last long in tough working conditions.
- » No performance loss with long mains and welding cables.
- » Fan cooled, protected against overheating.
- » Electrode-holder cable, earth clamp cable, mains cable, gas hose and TIG torch are included in the standard equipment.

Portable Professional DC TIG Welding Inverters

For Steel, Stainless Steel & Copper

Inverter Technology for Production & Repair of Thin Metals

Monotig 160ip

- » Operates with 1 Phase 230V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » TIG arc ignition by HF or Soft-Start.
- » Good thin metal welding, due to its fine pulsing capability upto 2khz.
- » Enhanced TIG controls; pre-gas, slope-up, main current, pulse frequency, pulse duty cycle, base current slope down, post-gas, crater filling settings.
- » 10 Job Storage.
- » Trigger latching. (2/4)
- » Precise monitoring of welding parameters via digital display.
- » Professional torch and foot usage for triggering.
- » Especially designed for outdoor use, protection class is IP 23S.
- » Light weight, easy to carry but rugged design to last long in tough working conditions.
- » Fan cooled and thermally protected against overloading.
- » Electrode-holder cable, earth clamp cable, mains cable, gas hose are included in the standard equipment.

Inverter Technology for Production & Repair of Thin Metals

Monotig 200i

- » Operates with 1 Phase 230V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » TIG arc ignition by HF or Soft-Start.
- » Excellent thin metal welding, due to its stable low current starting from 5 Amp.
- » Standard TIG controls; current, slope down, post gas, and crater filling.
- » Trigger latching. (2/4)
- » Precise monitoring of welding parameters via digital display.
- » Professional torch and foot pedal for triggering.
- » Especially designed for outdoor use, protection class is IP 23S.
- » Light weight, easy to carry but rugged design to last long in tough working conditions.
- » Fan cooled and thermally protected against overloading.

Trolley with Gas Bottle Platform

Foot Pedal

Single Phase Compact DC MIG / MAG Welding Machines

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

Inverter Technology for Workshops

Monomig 200ik

- » Operates with 1 Phase 230V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » Excellent welding characteristics with all types of solid and flux cored wires.
- » Built-in wire feeding system for spools 300, 270 and 200 mm in diameters and special wire inlet for drums.
- » Welding voltage, wire feed speed, as well as soft start for spatter free arc igniton, pre-gas, post-gas and crater filling for automation and wire burn-back time for anit sticking are set from the front panel and monitored on the digital displays.
- » Optimum welding parameters could be selected from the chart on the front panel.
- » Built-in trolley with gas bottle platform.
- » Fan cooled and thermally protected against overheating.
- » Earth clamp, electric line cable and gas hose are included in the standard equipment.

Step Controlled Transformer-Rectifier Technology for Workshops

MONOMAG 180

- » Operates with 1 Phase 230V-50/60Hz.
- » Excellent welding characteristics with all types of solid and flux cored wires.
- » Built-in wire feeding system for spools 300, 270 and 200 mm in diameters and special wire inlet for drums.
- » Welding voltage, wire feed speed are adjusted from the front panel. Optimum welding parameters could be selected from the chart on the front panel.
- » Soft start for spatter free arc igniton, pre-gas and post-gas for automation, wire burn-back time for antisticking could be set inside the wire spool cabinet.
- » Built-in trolley with gas bottle platform with 220V standard electric socket for CO2 gas heaters.
- » Fan cooled and thermally protected against overheating.
- » Easy to service due to its simple electromechanical design.
- » Earth clamp, electric line cable and gas hose are included in the standard equipment.

	Monomig 200ik	MONOMAG 180

Heavy Duty MMA Engine Driven Welders

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

MPM Series

- » Air cooled diesel engine driven welders with auxiliary outputs of 400 V / 50 Hz (3~), 230 V / 50 Hz (1~), 48 V / 50 Hz (1~)
- » CC/CV characteristics for Rutile, Basic and Cellulosic coated electrodes, Carbon Gauging and optionally for MIG/MAG and TIG processes.
- » Current adjustments are via potentiometer on the front panel or by an optional remote control box.
- » Ampere, volt, fuel level and operating hours indicators are located on the front panel.
- » Especially designed for outdoor use; protection class is IP 23S, no performance loss with long welding cables, large wheeled trailer to be lifted by trucks. (Standard for MPM 15/400 I-CL and optional for other models.)
- » Electric start by built-in 12 volts battery and automatically switching to idle at no-load.
- » Fault signals are, low fuel level, low oil pressure, battery charge failure and protection against current leakage and overheating.
- » Electrode-holder, earth clamp and electric-line cables are included in the standard equipment.

SCR Technology for Demanding Applications

RD 500 E

- » Operates with 3 Phase 400V 50/60Hz networks & generators. Tolerates voltage fluctuations up to 10%.
- » Excellent welding characteristics for Rutile, Basic and Cellulosic electrodes up to 6.0 mm. Carbon Gauging up to 8.5 mm.
- » Protection class is IP 21S, no performance loss with long welding cables, easy to move on rough grounds due to its large wheels and telescopic arms.
- » Hot-Start for easier arc ignition, Arc-Force to improve arc stability and Anti-Stick to avoid difficult electrodes to stick at short circuits during welding.
- » Current adjustment is via a potentiometer on the front panel or by a remote control box, amper and voltage can be digitally monitored from the front panel.
- » Fan cooled and protected against overheating.
- » Electrode-holder, earth clamp and electric-line cables are included in the standard equipment.

Heavy Duty Mechanically Controlled DC MMA Welding Machines

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

Magnetic Shunt Technology for Demanding Applications

TD 355

GL 451

GL 600

- » Operates with 3 Phase 400V 50/60Hz networks & generators.
- » Excellent welding characteristics for Rutile, Basic and Cellulosic electrodes. Carbon Gauging with GL models.
- » Especially designed for outdoor use; protection class is IP 22, no performance loss with long welding cables, easy to move on rough grounds due to their large wheels and telescopic arms.
- » Current adjustment and monitoring scales are mechanical.
- » Almost maintenance free and easy to repair at rural areas.
- » Fan cooled and protected against overheating.
- » Electrode-holder, earth clamp and electric-line cables are included in the standard equipment.

Industrial DC TIG Welding Inverters

For Steel, Stainless Steel & Copper

ID 250 T DC, ID 250 T DC Pulse

ID 300 T DC, ID 300 T DC Pulse

ID 300 TW DC, ID 300 TW DC Pulse

» Operates with 3 Phase 400V-50/60Hz networks & generators. Tolerates voltage fluctuations upto %15.

» Welding current starting from 5 ampere is ideal for TIG process and arc is very stable all through the adjustment range and excellent welding characteristics for Rutile, Basic & Cellulosic electrodes.

» HF or Soft Touch ignition.

» Enhanced TIG controls; pre-gas, slope-up, man current, slope down, post-gas, crater filling settings. For pulsed models additionally, pulse frequency, pulse duty cycle & base current settings.

» 10 Job Storage.

» Trigger latching. (2/4)

» Other than torch, current and start/stop can also be controlled by a foot pedal. (Optional)

» Precise monitoring of welding parameters via digital display.

» Protection class is IP 21S.

» Separate industrial water cooling unit and trolley with gas bottle platform for TW versions.

» Fan cooled and protected against overheating.

» Electrode-holder cable, earth clamp cable, man's cable, gas hose and TIG torch are included in the standard equipment.

Industrial MIG/MAG Welding Inverters

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

Inverter Technology for Continuous Production

ID 300 M (CV)

ID 400 MW (CC/CV)

ID 500 MW (CC/CV)

- » Operates with 3 Phase 400 V 50/60 Hz networks & generators. Tolerates voltage fluctuations upto %15.
- » Excellent welding characteristics with all types of solid and flux cored wires.
- » While ID300M has a Constant Voltage (CV) power source for MIG/MAG process, ID400MW & ID500MW has Constant Current & Constant Voltage (CC/CV) power sources enabling operators to use stick electrode and carbon gauging processes as well as the MIG/MAG process.
- » ID400MW & ID500MW are ready to weld with any type of ROBOT. According to the robot type, digital & analog communication is possible.
- » **magNET ready:** Welding and environmental data is stored in real time scale. While certain values are directly read on the LCD panel, more information like OEE and WP/Quality information could be monitored and stored on the magNET platform (Optional).
- » 3 Adjustment Modes; SYNERGIC, EASY, NORMAL makes it especially easy for operators who used to weld with conventional equipment.
- » Synergic feature for optimum welding parameter selection through the LCD menu by Wire Type, Wire Size, Gas Type, and Thickness selection.
- » Trigger Mode (2/4), Soft Start for spatter free arc ignition, Pre-Gas, Post-Gas and Crater Filling for automation, Burn-Back time for anti sticking and Spot On/Off timers can be set through the LCD panel.
- » Welding Voltage, Welding Current or Wire Feeding Speed, according to the selected mode can be set or fine tuned by potentiometers and comfortably monitored by separate big digital displays.
- » The 2 way button for Inchng and Gas Purge is inside the wire feeder compartment.
- » Separate Wire Feeding System for spools 300, 270 and 200 mm in diameters and special wire inlet for drums.
- » The 4-wheel drive system assures good feedability with longer torches and less deformation of delicate wires like aluminum and flux cored wires.
- » Standard harness between wire feeder box and the base machine is 5m long. Upon request this could be extended up to 30m.
- » Built-in trolley wth gas bottle platform and 24V DC electric socket for CO gas heater.
- » Water cooling unit si at the base of the trolley and it is powerful enough to support in warm climates and long harness. (MW models)
- » For air cooled models a large drawer is placed instead of the water cooling unit for welder's necessities. (M models)
- » Outer case is made out of steel and coated with electrostatic powder painting for a corosion free longer service life.
- » Protection Class is IP21S.
- » Protected against missing phase or excessively high or low line voltage.
- » Fan cooled and protected against overheating.
- » Smart Cooling enables all turning parts, like fans and pump motors, work according to the heating levels. This function significantly reduces noise levels, dust accumulation inside of the equipment, energy consumption and service needs.

MIG/MAG Accessories Set (Torch + Heater + Regulator)	Set 2 (7920000520)	Set 2 (7920000520)	Set 3 (7920000530)	Set 3 (7920000530)	Set 3 (7920000530)

Industrial Water Cooled DC MIG / MAG Welding Machines

For All Types of Metals (Steel, Stainless Steel, Aluminum Etc.)

SCR Technology for Extreme Conditions

RD 650 MW

Step Controlled Transformer-Rectifier Technology for Heavy Duty Production

RS 350 MW

RS 400 MW

RS 450 MW

RS 500 MW

- » Operates with 3 Phase 400V - 50/60Hz.
- » Excellent welding characteristics with all types of solid and flux cored wires.
- » Separate Wire Feeding System for spools 300, 270 and 200 mm in diameters and special wire inlet for drums.
- » Standard harness between wire feeder box and the base machine is 5m long. Upon request this could be extended up to 30m.
- » The 4 Wheel drive system assures good feedability with longer torches and less deformation of delicate wires like aluminum and fluxcored wires.
- » For RS Models: Welding voltage is adjusted from the front panel of the base machine and wire feed speed is adjusted on the front panel of the wire feeder box. Welding voltage & current are monitored on the digital displays. Optimum welding parameters could be selected from the chart on the front panel of the wire feeder box. For RD Models: Welding voltage and wire feeding speed is adjusted and monitored by the digital displays on the front panel of the wire feeder box.
- » Soft Start for spatter free arc ignition, pre-gas and post-gas for automation, wire burn-back time for antisticking could be set inside the wire spool cabinet.
- » Trigger latching (2/4) switch and manual wire feeding (inching) button for threading.
- » For low spatter welding, according to the current range 2nd and 3rd work-piece outlets are provided.
- » Protection Class is IP 21.
- » Separate powerful water cooling unit is able to support in warm climates and long harnesses.
- » Built-in trolley with gas bottle platform with 220V standard electric socket for CO₂ gas heaters.
- » Strong outer case made by 1.2 mm steel sheet and coated with electrostatic painting for a corrosion free longer service life.
- » Fan cooled and thermally protected against overheating.
- » Earth clamp, electric-line cable and gas bottle hose are included in the standard equipment.

NOTES

We Manufacture Welding Consumables & Equipment Since 1957

Magmaweld is a manufacturer of Stick Electrodes, MIG/MAG & TIG Wires, Flux Cored Wires, Submerged-Arc Wires and Fluxes, Welding Machines, Welding Ancillary Products and Automation Systems in Turkey. Oerlikon Kaynak Elektrodları ve Sanayi A.Ş. was founded in 1957 in order to manufacture stick electrodes as a licensee of Oerlikon-Buehrle AG.
